TECHNICAL SKILLS

LANGUAGES: C#, TypeScript, JavaScript, SQL, Python, Java, HTML, CSS

FRAMEWORKS & LIBRARIES: .NET Core, .NET 8, .NET 10, ASP.NET Core Web API, ASP.NET MVC, Entity Framework, LINQ, Kafka

FRONT-END & TESTING: Angular, React, React Native, Playwright, NUnit, Allure, HyperExecute, WCAG/Accessibility Testing

DATABASES: SQL Server, PostgreSQL, MongoDB, Firebase

CLOUD & DEVOPS: Azure, AWS, Azure Kubernetes Service (AKS), OpenShift (OCP), Docker, Kubernetes, Helm, Terraform, Jenkins, Harness, CI/CD, HashiCorp Vault, Supabase, YAML

TOOLS & MONITORING: Git, GitHub, Jira, Splunk, AppDynamics, Artifactory, Black Duck, kubectl, Linux, Bash, Liquibase

AI DEVELOPMENT: Gemini API, Model Context Protocol (MCP), GitHub Copilot, Cursor, Claude Code, OpenAI Codex

CERTIFICATIONS: Microsoft Azure Fundamentals (AZ-900)

WORK EXPERIENCE

WELLS FARGO

Software Engineer

Charlotte, NC | July 2024 – Present

- Built and supported business-critical financial systems using C#, .NET Core, Angular, TypeScript, HTML, CSS, SQL Server, Entity Framework, LINQ, and Azure, supporting millions of dollars in daily transaction activity and thousands of internal users.
- Modernized legacy services and batch applications from .NET Framework 4.8 and .NET 8 environments to .NET 10, resolving compatibility and security issues while migrating critical workloads and microservices without disrupting existing business processes.
- Designed an event-driven Kafka and Azure Blob ingestion workflow that deserialized financial messages into SQL staging tables and enforced processing-order guarantees to protect downstream data integrity.
- Refactored and expanded Playwright automation with HyperExecute and Allure reporting, adding secure credential handling, trace diagnostics, and reusable test patterns to expand regression coverage and make failures easier to diagnose before release.
- Supported application deployment and integration across Azure AKS and OpenShift OCP, resolving Helm, Vault, certificate, and environment issues with kubectl and Azure Cloud Shell to unblock UAT/integration testing and maintain release readiness.
- Implemented Liquibase changelogs with rerunnable SQL deployment scripts and rollback packages across Dev and UAT, standardizing database releases and reducing risk from manual or inconsistent schema changes.

CIGNA HEALTHCARE

Software Engineer (Intern)

Austin, TX | May 2023 – August 2023

- Delivered micro-frontend, API, and cloud improvements across five pharmacy applications using React, Java, JavaScript, SQL, AWS, and Agile delivery practices.

CIGNA HEALTHCARE

AI Engineer (Intern)

Bloomfield, CT | May 2022 – August 2022

- Developed a Kore.ai chatbot that automated Tier-1 IT support and reduced average response time by 50%, then used SmartAssist workflow analytics to improve chatbot accuracy by 15%.

APEX ANALYTIX

Software Engineer (Intern)

Greensboro, NC | May 2021 – January 2022

- Designed, developed, and maintained full-stack enterprise applications using C#, .NET Core, .NET Framework, ASP.NET MVC, SQL, Entity Framework, WPF, and WinForms for internal and customer-facing workflows.

MARATHON PETROLEUM CORP.

Software Engineer (Intern)

Findlay, OH | January 2021 – May 2021

- Developed C#, .NET Core enterprise applications and SQL Server data workflows supporting logistics and operational teams in an Agile development environment.

SELECTED PROJECTS

CLOO

AI-Powered Language Accessibility Tool

Link: <https://cloo-tkwb.onrender.com/>

- Independently built and deployed a multilingual tech-jargon translator at Hack RenderATL (MLH) in 24 hours using React, Vite, Node.js/Express.js, Google Gemini API and Cloud Speech APIs, delivering plain-English explanations, translations, and bilingual mock-interview feedback across 9 languages.

TASKOLOGY

Full-Stack SaaS Project

Link: <https://taskology.tools/>

- Built and launched an AI-assisted engineering ticketing SaaS using TypeScript, Next.js, FastAPI, Supabase/PostgreSQL, Stripe, and Railway, including REST APIs, authentication, subscriptions, quota enforcement, exports, and admin workflows.

CONSTANTIME

Full-Stack Study Platform

Link: <https://constantime.net/>

- Built and launched a mobile-friendly DSA study companion using TypeScript, Next.js, and Supabase, implementing timed sessions, study plans, progress tracking, streaks, authentication, cloud synchronization, and transactional email workflows.

EDUCATION

North Carolina Agricultural & Technical State University

Bachelor of Science in Computer Science | May 2024
