TECHNICAL SKILLS

Certifications: Microsoft Azure Fundamentals (AZ-900)

LANGUAGES: C#, TypeScript, JavaScript, SQL, Python, Java, HTML, CSS

FRONT-END & TESTING: Angular, React (Web & Native), Playwright, NUnit, Allure, HyperExecute, WCAG/Accessibility Testing

FRAMEWORKS & LIBRARIES: .NET Core, .NET 8, .NET 10, ASP.NET MVC, LINQ, Kafka

DATABASES: SQL Server, PostgreSQL (Supabase), MongoDB, Firebase

CLOUD & DEVOPS: Azure, Azure Kubernetes Service (AKS), OpenShift (OCP), Harness, Docker, Kubernetes, Helm, Jenkins, YAML, Terraform, CI/CD, HashiCorp Vault, AWS

TOOLS & MONITORING: Git, GitHub, Jira, Splunk, AppDynamics, Artifactory, Black Duck, kubectl, Liquibase

AI Tooling: GitHub Copilot, Cursor, Claude

WORK EXPERIENCE

WELLS FARGO

Software Engineer

Charlotte, NC | July 2024 – Present

- Built and supported business-critical financial applications using C#/.NET, Angular/TypeScript, HTML, CSS, SQL Server, and Azure, supporting millions of dollars in daily transaction activity and thousands of internal users.
- Modernized legacy services and batch applications from .NET Framework 4.8 and .NET 8 to .NET 10, resolving compatibility and security issues while moving critical workloads onto the current technology platform without disrupting existing business processes.
- Designed an event-driven Kafka and Azure Blob ingestion workflow that deserialized financial messages into SQL staging tables and enforced processing-order guarantees to protect downstream data integrity.
- Refactored and expanded Playwright automation with HyperExecute and Allure reporting, adding secure credential handling, trace diagnostics, and reusable test patterns to expand regression coverage and make failures easier to diagnose before release.
- Supported application deployment and integration across Azure AKS and OpenShift OCP, resolving Helm, Vault, certificate, and environment issues with kubectl and Azure Cloud Shell to unblock UAT/integration testing and keep releases moving toward production readiness.
- Remediated DAST and application-security findings while improving application logging and observability, reducing release security blockers and giving engineering teams better diagnostic visibility during validation and production-readiness testing.
- Implemented Liquibase changelogs with rerunnable SQL deployment and rollback packages across Dev/UAT, standardizing database releases and reducing risk from manual or inconsistent schema changes.

CIGNA HEALTHCARE

Software Engineer (Intern)

Austin, TX | May 2023 - Aug 2023

- Developed user-interface, API, data, and cloud improvements across five pharmacy applications using React, Java, JavaScript, SQL, AWS, and Agile/Scrum delivery practices.
- Contributed to backend RESTful API development and SQL-based data analysis while collaborating with engineers, product stakeholders, and QA across the software development lifecycle.

CIGNA HEALTHCARE

AI Engineer (Intern)

Bloomfield, CT | May 2022 - Aug 2022

- Developed a Kore.ai chatbot that automated Tier-1 IT support and reduced average response time by 50%, then used SmartAssist workflow analytics to improve chatbot accuracy by 15%.

APEX ANALYTIX

Software Engineer (Intern)

Greensboro, NC | May 2021 – Jan 2022

- Designed, developed, and maintained full-stack enterprise applications using C#, .NET Core, .NET Framework, ASP.NET MVC, SQL, WPF, and WinForms for internal and customer-facing workflows.

MARATHON PETROLEUM CORP.

Software Engineer (Intern)

Findlay, OH | Jan 2021 – May 2021

- Developed C#/.NET Framework enterprise applications and SQL Server data workflows supporting logistics and operational teams in an Agile development environment.

SELECTED PROJECTS

Taskology

Full-Stack SaaS Project

Link: <https://taskology.tools/>

- Built and launched an AI-assisted engineering-ticket SaaS using TypeScript/Next.js, FastAPI, Supabase/Postgres, Stripe, and Railway, including REST APIs, authentication, subscriptions, quota enforcement, exports, and admin workflows.

Constantime

Full-Stack Study Platform

Link: <https://constantime.net/>

- Built and launched a mobile-friendly DSA study companion using TypeScript/Next.js and Supabase, implementing timed sessions, study plans, progress tracking, streaks, authentication, cloud sync, and transactional email.

EDUCATION

North Carolina Agricultural & Technical State University

Bachelor of Science in Computer Science
